

USA Corvette Club

Dalton, Georgia
United States

We are a socially oriented club with a common interest in the Made in America CORVETTE. It is the interest in the car that has brought us together, but it is the people that keeps us together. We enjoy day cruises, going out to dinner, weekend excursions, attending car shows and cruise-ins. Our members enjoy a private club house where our monthly meeting and casual dinners are held. Our facility allows us to be able to bring our cars inside for members who need to perform minor maintenance on their own vehicles. We encourage all area Corvette owners to come check us out! We attempt to try and have at least one day cruise every month and sometimes more than one a month, with one on a Saturday and possibly one during the week. We try to attempt and have something for everyone. Weekday cruises accommodate members that are retired or members that work shift work that must work weekends. The weekend cruises accommodate members that have weekends off. Some history about the Corvette: the first Corvette was produced in June 1953 with only 300 being built the first year. The Corvette has close to a 70-year history. During this time there have been 8 major body changes, but it has always maintained the two-passenger concept. The first (C1) to the latest model (C8), which is its first mid-engine corvette released in model year 2020. So, if you are an owner of one of these fine automobiles, please consider coming to visit us at one of our monthly meetings. You will be welcomed by all our members.
