#### *Involved Region or Country*

North America, Europe, Russia,  
Middle East, Israel, Argentina, Brazil,  
Bolivia, Chile, Colombia, Ecuador,  
Paraguay, Peru, Uruguay, Japan, GM  
Korea Company, China, Taiwan,  
Philippines

#### *Condition*

### *Cause*

Some customers may comment on a discoloration or black stain on the paint of the brake calipers.

This may be caused by high brake pad temperatures during aggressive driving or track event tarnishing the caliper paint.

### **Correction**

**Important:** Do *NOT* replace the brake calipers for this condition.

This is not a defect in the paint or the caliper.

- |     |   |
|-----|---|
| (1) | Not cleaned using mild polishing compound |
| (2) | Cleaned using mild polishing compound     |

If the customer wishes to have the black stain removed, a very mild polishing compound can be used to remove the stain.

**Important:** Do NOT use harsh chemicals or brake cleaner to attempt

to remove the stain. This could damage the paint on the caliper.
