

# 1953 - 1955 Corvette: Reports - International Registry of Early Corvettes

In the early 1970s, George Campbell led an effort (IREC) to count and categorize 1953 - 1955 Corvettes.

The IREC issued 3 reports. The reports are valuable historical documents in that they provide statistical information on paint colors, engine replacement and other interesting items.

The IREC reports say that the reports can be reprinted if proper acknowledgement is given.

Below are the the reports in PDF format. Each PDF file is 3 pages.
