2005 Corvette: GM TechLink: Gasoline Engine Oil Requirements

2005 GM gasoline engines require the use of an engine oil that has the American Petroleum Institute (API) Starburst and states that it meets GM Standard GM6094M (non-synthetic) or GM4718M (synthetic). Failure to use the recommended engine oil can result in engine damage not covered by warranty.

In the March 2005 issue, TechLink published a list of engine oil brands that meet GM Standard GM6094M and GM4718M. This list has be updated through April 12, 2005.

TIP: This list will be updated in the future as required. Download the latest PDF document on the left.

General Motors bulletins are intended for use by professional technicians, not a "do-it-yourselfer". They are written to inform those technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions and know-how to do a job properly and safely. If a condition is described, do not assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See a General Motors dealer servicing your brand of General Motors vehicle for information on whether your vehicle may benefit from the information.
