CONDITION

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 1997-2000 Chevrolet Corvette model vehicles. Some of these vehicles exhibit a condition in which the lap belt webbing may twist, allowing the webbing to become jammed in the retractor. When the belt webbing becomes jammed in the retractor, the belt may be unusable. In a vehicle crash, an unbelted occupant may receive more severe injuries.

CORRECTION

Dealers are to install inserts to the belt web guide of each lap belt retractor.
