## **1953 - 1958 Corvette: Service Bulletin: Fuel Filter Element Maintenance**

Subject: Fuel Filter Element Maintenance
Model and Year: 1957-1958 Models - Passenger
Source: Chevrolet Service Bulletin
Bulletin Number: DR #370, Section VIm, July 18, 1958

A highly efficient fuel filter mounted near the carburetor on some 1957 and 1958 models gives the Chevrolet owners protection from foreign material and resulting carburetor problems.

This filter has a removable sediment bowl for clean-out and a replaceable element.

Filter elements should be replaced every 5,000 miles as covered in Owner's Manual Maintenance Chart to insure trouble free operation for the customer.

## PARTS DATA

Description	Usage	Part No
Filter Element	56-58 (ex. D.D. 6 cyl.)	854347
(W/Gasket)	53-58 Corvette	

General Motors bulletins are intended for use by professional technicians, not a "do-it-yourselfer". They are written to inform those technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions and know-how to do a job properly and safely. If a condition is described, do not assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See a General Motors dealer servicing your brand of General Motors vehicle for information on whether your vehicle may benefit from the information.
